Sign in as a regular user

Use your organization's SSO to sign in as a user to view dashboards created by your organization.

Prerequisites:

Dashboards require admins to create and publish them to the organization first.

Note: This sign in is for non-admin users who need to view **organizational hierarchy dashboards**. If you are an admin who wants to see more dashboards, refer to **Sign in to the Mobile App as an admin**.

1. Open the **Mobile App**.
2. Click **Sign In**.
3. Click **Company SSO**.
4. Enter in the panel name.

Note: The name of your panel can be found in Community. If you cannot find your panel name, please contact your Alida Customer Success Representative or email **support@alida.com**.

Result: This will direct you to your SSO provider's website to sign in.

5. Enter your SSO account's email and password.

Result: Your SSO credentials are checked.
